

## Using MyEtherWallet

1. Go to MyEtherWallet and access your wallet, or follow the instructions to create a new one.
2. Click on Send Ether & Tokens
3. Access your wallet and log in
4. In the "To Address" field, fill in the ICO contract address:

Available at ICO start.

5. We strongly advice to use at least 300,000 as gas limit to make sure your transaction will be processed by the contract.
6. You can usually lower gas price to 10 Gwei and still get your transaction processed in a short time.
7. Press Generate Transaction followed with Send Transaction
8. Press "Add Custom Token" under "Token Balances" in the right column
9. In the "Address" field, fill in the token contract address:

Available at ICO start.
